BUILD YOUR OWN ONLINE SHOP

From Amazon to High Street retailers, the internet is full of online shops. A quick search in Google and you will be spoiled for choice with products, discounts and brands.

How would you like to learn how to build your very own online shop?

This exciting 7-week club will show you exactly how to do that and the great thing is, you don't even have to code your website! No coding skills are required, only a desire to learn new digital skills and explore your inner entrepreneur.

The course will take you from beginner to online shop owner in super quick time. This is a great opportunity to turn your hobby into your very own online business.

Sign up today and start your journey as a digital entrepreneur.

This club will be delivered by Jody Greig. He is an experienced teacher of computing, software engineer and specialises in building websites and online shops.
