Amazon Future Engineer Bursaries

**£5,000 per year for up to four
years of study for women studying
computer science or related
engineering degree courses**

Amazon Future Engineer bursaries support women A-level and BTEC/OCR (or Scottish equivalent) students from low-income households who wish to study computer science or related engineering courses at UK universities, starting in 2021.

The bursaries aim to help address underrepresentation of women in computing and engineering degrees and in these professions. If successful in your application, you will receive a financial support package worth £5,000 per year for up to four years of study to cover expenses related to attending university, including tuition fees or accommodation and living costs.

You will also gain exclusive access to networking groups to meet positive role models, interact with like-minded peers, build long-term relationships, and benefit from collaboration opportunities.

The closing date for applications is 4.00pm
Monday 14 June 2021, and eligibility criteria applies.

To see if you are eligible and to make an application,
