FUTURE WORLD OF WORK

Edinburgh, Midlothian & East Lothian (2021-2031)

The digital revolution is impacting all sectors. Roles such as coders and software developers underpin the tech industry and there is an increasing demand for people with hybrid skill sets combining tech with aptitude in business, science, or health.

Green jobs will grow and include those in renewable energy, the circular economy and zero waste, the nature-based sector, plus jobs with wider 'green skills' in sectors supporting the transition to net zero.

The Future Labour Market
